RTI² Framework 2013
Response to Instruction & Intervention Framework
Our new accountability system has two overarching objectives:

1. Growth for all students, every year
2. Faster growth for those students who are furthest behind
Beliefs

• Every student can learn, demonstrate growth, and has the right to actively participate in high quality, research-based education that maximizes their potential in the least restrictive environment.

• Specialized education is a continuum of services, not a place.

• Relationships with all stakeholders, based on respect and understanding will result in making decisions in the best interest of ALL students.

• Every staff member has the responsibility to teach, support and encourage ALL students.

• Strong leadership at every level is the foundation of a collaborative and inclusive environment that supports ALL students.

• High quality professional learning in conjunction with family and community support, empowers all stakeholders to collaboratively build capacity for the success of ALL students.
What is the difference?

• What is **NOT** response to intervention?

• What **IS** response to intervention?
Response to Intervention is NOT:

• Just a Special Education initiative

• Only for students with disabilities

• Only for beginning reading

• A new way to identify students with SLD

• A way of reducing costs or eliminating special education or the LD category

• This year’s summer reform or a short-term implementation based on “RTI in a Box”

• A way to fix schools with weak core instruction

Response to Intervention Is:

- A set of processes for coordinating high quality service delivery in schools
- A multi-tiered, layered instructional approach that prevents problems first, and then brings increasingly intense interventions to students who don’t respond
- Making instructional decisions based on data
- Integrating entitlement programs with general education
- Providing relevant data for SLD identification
- Primary goal: Improving academic (and behavioral) outcomes for all students by eliminating discrepancies between actual and expected performance.

Key Goals of Special Populations

Improving Student Outcomes

• Prevention

• Intervention

• Achievement

• Outcomes

• Manage Performance
As of July 1, 2014, RTI² will be the framework used by teams to identify a student with a Specific Learning Disability.

Final reading approval from State Board of Education was June 21, 2013.
Tennessee RTI² Model

**TIER I**  All  80–85%
All students receive research-based, high quality, general education instruction using Common Core Standards in a positive behavior environment that incorporates ongoing universal screening and ongoing assessment to inform instruction.

**TIER II**  Some  10–15%
In ADDITION to Tier I, interventions are provided to students that fall below the 25th percentile on universal screening and are struggling academically and/or behaviorally. Research-based interventions will be provided to students within their specific area(s) of deficit. These students are progress monitored using a tool that is sensitive to change in area of deficit and that provides a Rate of Improvement (ROI) specific to the individual deficit.

**TIER III**  Few  3–5%
In ADDITION to Tier I, interventions are provided to students who have not made significant progress in Tier II, are 1.5-2.0 grade levels behind or are below the 10th percentile. Tier III interventions are more explicit and more intensive than Tier II interventions. Research-based interventions will be provided to students within their specific area(s) of deficit. These students, who are struggling academically and/or behaviorally are progress monitored using a tool that is sensitive to change in area of deficit and that provides a Rate of Improvement (ROI) specific to the individual deficit.

Guiding Principles
- Leadership
- Culture of Collaboration
- Prevention & Early Intervention
Tier 1

Core Instruction 80–85%
- High quality instruction aligned to Common Core Standards
- Instructional decisions driven by ongoing formative assessment
- High quality professional development and support

Ongoing Assessment
- Does not meet grade-level expectations
- Meets grade-level expectations
- Exceeds grade-level expectations

Provide enrichment

If student is more than 1.5–2 years behind, may need Tier III intervention.
Tier I - Instruction

- Classroom instruction for all - Common Core State Standards

- Research shows 80-85% of students will respond to Tier I

- Recommended Instructional Time
  - ELA: K-2/150 min; 3-5/90 min; 6-12/55 traditional 90 block
  - Math: K-1/60 min; 2/75min; 3-5/90 min; 6-12/55 traditional 90 block

- Ongoing Assessments (grade level checks, benchmarks)
  - Collect data points, determine patterns, track individuals and groups,
  - Guide instruction (teach/assess/monitor/adjust)

- Fidelity Monitoring (Team, Student Data, etc...)

- Universal Screener (K-8, recommended 9-12)(students below 25% go to Tier II)
Areas of Deficit: A Universal Screener will explicitly measure...

- Basic Reading Skills (letters, letter sounds, phonological awareness, phonics)
- Reading Comprehension
- Reading fluency
- Written expression
- Math calculation (column addition, basic facts, complex computation, decimals, fractions, conversions, percentages, etc.)
- Math reasoning/problem solving (number and operations, base ten, place value, measurement and length, fractions, geometry, algebra, expressions, linear equations etc.)
What does your Universal Screener tell you?

**Standards based**
- Intervene on a standard
- Tells you what to reteach/remediate (Tier 1)
- Adaptive. Task changes based on student performance
- Does not consistently measure the same skill over and over to determine if intervention is working

**Skills based**
- Intervene on skill deficit/need
- Warning system for your most at-risk students and identifies discrete skill deficit(s)
- Not adaptive. Task does not change based on student performance
- Consistently measures same skill
- Independent of grade level standard

What is the difference?

- What is reteaching/remediation?
- What is intervention?
Reteaching VS. Intervention

**Reteaching**
Tier I - Common Core Standards

- Goal is to reteach standards that students are struggling with rather than specific skill deficits. These are your “bubble kids”.

**Standards Based Assessment:**
- Benchmark Assessment
- Summative Assessment
- Formative Assessment

**Intervention**
Tier II/III/Special Education Intervention

- Goal is provide research based interventions aligned to specific skill deficit(s) as identified by a universal screener.

**Skills Based Assessment:**
- Skills based universal screener aligned to area(s) of deficit
- Skills based Progress Monitoring specific to area(s) of deficit
- Formative assessment
Tier II

Targeted Intervention 10–15%

- Addresses the needs of struggling and advanced students
- Additional time beyond time allotted for the core instruction
- High quality intervention matched to student-targeted area of need
- Provided by highly trained personnel

Progress Monitoring required for data-based decision making

Does not meet grade-level expectations

Meets grade-level expectations
Tier II Interventions

• A change in intervention will be considered within each tier before moving to the next tier of intervention.

• **8-10 data points** (if progress monitoring **every other week**) *OR* **10-15 data points** (if progress monitoring **weekly**) are needed to make a sound data based decision.

• Number of data points reflects empirical research required to make an informed data based decision.

• The intervention must have empirical evidence supporting its use in remediating the area of suspected disability (i.e., Basic Reading Skills).

• A **skills based** progress monitoring tool must be able to provide evidence that the student did not make a sufficient amount of progress in the area of deficit.
**Tier III**

**Targeted Intervention 3–5%**
- Addresses small percentage of struggling students
- More explicit and more intensive intervention targeting specific area of need
- Intervention provided by highly trained personnel

Progress Monitoring required for data-based decision making

- **Does not** make significant progress
- **Makes significant** progress

Consider possible need for Special Education referral after Tier II and Tier III interventions and fails to make adequate progress based on gap analysis.
Tier III Interventions

• A change in intervention will be considered within each tier before moving to the next tier of intervention.

• **8-10 data points** (if progress monitoring *every other week*) **OR 10-15 data points** (if progress monitoring *weekly*) are needed to make a sound data based decision.

• Number of data points reflects empirical research required to make an informed data based decision.

• The intervention must be more intense than the intervention provided at Tier II.

• A *skills based* progress monitoring tool must be able to provide evidence that the student did not make a sufficient amount of progress in the area of deficit.
Does the student **NEED** more Intensive Intervention(s)?

- Students may immediately require Tier III intensive intervention.
  - If students are below the 10\textsuperscript{th} percentile or 1.5 to 2.0 grade levels behind.
  - Your data team should make these decisions on an individual basis.

- Students who are immediately placed in Tier III level intervention must receive the minimum number of recommended minutes of intervention.

- The purpose of immediately placing a student in Tier III intervention is to increase the **intensity** of the intervention, not to shorten the **duration** of the intervention period.
Students may be screened by a specialist (e.g., school psychologist or reading specialist) at any time within the tiers to provide instructional and/or program planning information.

Consent is not required for screenings that inform instruction/interventions within the tiers.

Example: Phonics screening to determine specific interventions.
• If data indicates a student’s progress is not sufficient, then the team may obtain *Notice and Consent for Initial Evaluation*.

• The team must complete all evaluations and establish the student’s eligibility for service within the initial evaluation timeline.

• The student will remain in intervention and will continue to be progress monitored while the requested evaluations are being completed.

• All information collected including the student’s responsiveness to intervention will be a part of the student’s eligibility determination.
## TN SLD Definition Made Easy

<table>
<thead>
<tr>
<th>Condition 1</th>
<th>Condition 2</th>
<th>Condition 3</th>
</tr>
</thead>
</table>
| **Underachievement in:** | **RTI:** Insufficient response to scientific, research-based intervention. | **Exclusionary Factors:** Conditions 1 and 2 are not primarily due to:  
Visual, Hearing, or Motor Disability;  
Intellectual Disability;  
Emotional Disturbance;  
Cultural Factors;  
Environmental or Economic Disadvantage;  
Limited English Proficiency; or,  
Excessive Absenteeism. |

Mathematics Calculation  
Mathematics Reasoning | | |
All re-evaluations for students with a Specific Learning Disability will be grounded in progress monitoring data.

Existing data including ongoing assessments of progress and focused/diagnostic evaluations will be reviewed through the Re-evaluation Summary Report to determine if additional information is needed.

A gap analysis will be completed and the student’s ROI will be calculated in order to determine the amount of services/intervention required to close the achievement gap.

The level of service required (special education versus general education) will be used to negate or substantiate continued eligibility.
What happens if a Parent Requests an Evaluation?

- The team must complete the agreed upon components of the evaluation within the initial evaluation timeline.

- The student may be eligible for services as a student with a Specific Learning Disability based **only** on the RTI² Framework.
  - No option to use discrepancy model.

- If the team lacks sufficient evidence to establish the student’s eligibility for services:
  - the team may agree to **request an extension** of the evaluation timeline.
  
  **OR**

  - the student will be **made ineligible** **until** sufficient data can be collected.
Consider this...Special Education is not a place! It is the most Intensive Intervention!

Special Education Interventions:

– The student will remain in core, differentiated instruction (Tier I) within the general education curriculum to the greatest extent possible.

– The same problem solving approach used in the general education RTI² framework will be used in special education.

– Interventions will be tailored to the student in the area of identified disability, and progress toward their IEP goals will be monitored weekly or every other week.

– If students fail to respond to interventions provided through special education, an IEP team meeting will be reconvened.
Consider this...Special Education is not a place! It is the most Intensive Intervention!

- After the team determines an area of deficit, the student will receive a research based intervention in his or her specific area of need. Students will receive progress monitoring in the area of deficit and parents will be notified.

- Students receiving special education intervention will receive their intervention outside of core instruction to the greatest extent possible.

- Special education intervention will be the most intensive interventions provided.

- Students may receive intervention from special education and general education at the same time. Focus on the data!

- EA’s are used to help children access the core instruction. They are not the intervention.
Tier II, Tier III or Sped Intervention: Core Instruction Plus A skill specific intervention
Core instruction plus Intervention (Tier II, Tier III or Sp.Ed)

- Core Instruction Plus Tier II (30 minutes daily)
- Core Instruction Plus Tier III (45-60 minutes daily)
- Core Instruction Plus Sp.Ed Intervention (More Intensive than Tier III)
Response to Instruction & Intervention
